Prepared By

Strategic Delivery Office

Issue Date

03 Apr 2026

Validity

15 days from issue date

Executive Summary

Thank you for inviting Ignisia Digital Labs to respond to your product modernization initiative. This proposal is designed to help Acme Fintech modernize the user experience, streamline operational workflows, improve reporting visibility, and create a scalable delivery foundation for future growth. Our recommended approach combines product strategy, experience design, frontend engineering, integration support, quality assurance, and release readiness into one coordinated engagement.

Business Objectives

- Improve onboarding completion and day-to-day workflow efficiency for enterprise users.
- Modernize the product interface to align with a stronger enterprise positioning.
- Reduce operational dependency on manual processes through automation and system integration.
- Establish a scalable technical foundation for future modules and reporting enhancements.

Proposed Response

- Structured discovery, design, implementation, QA, and go-live support in phased delivery.
- Reusable frontend architecture with responsive interface patterns and maintainable code standards.
- Integration planning for billing, CRM, notifications, and operational reporting workflows.
- Weekly stakeholder reviews with milestone tracking, delivery visibility, and controlled sign-offs.

Scope of Work

- Discovery workshops, requirement alignment, and target-state technical planning.
- UX refinement for onboarding, dashboard, admin, billing, and reporting journeys.

- Frontend implementation using reusable modules and responsive component architecture.
- Integration support for CRM, payments, notifications, and reporting workflows.
- QA hardening, launch readiness, documentation, and post-release stabilization support.

Commercial Proposal

Item	Quantity	Unit Cost	Total
Product discovery and solution architecture	1	Rs. 1,25,000	Rs. 1,25,000
UX design system and key workflow design	1	Rs. 1,80,000	Rs. 1,80,000
Frontend engineering and component implementation	1	Rs. 3,25,000	Rs. 3,25,000
Integration support and automation setup	1	Rs. 1,45,000	Rs. 1,45,000
QA, launch assistance, and handover documentation	1	Rs. 80,000	Rs. 80,000
Subtotal			Rs. 8,55,000
GST (18%)			Rs. 1,53,900
Grand Total			Rs. 10,08,900

Why Acme Fintech can rely on Ignisia

- Senior delivery ownership across design, engineering, and project governance.
- Clear communication rhythms with milestone reviews, risk visibility, and weekly status reporting.
- Focus on implementation quality so the platform remains maintainable after launch.

Timeline and Milestones

- Week 1: Discovery workshop, requirement alignment, and solution blueprint.
- Weeks 2-4: UX refinement, design system decisions, and key workflow approvals.
- Weeks 5-8: Engineering execution, integration work, QA cycles, and review demos.
- Week 9: UAT support, stabilization, final handover, and launch assistance.

Key Deliverables

- Approved UX direction with key journey definitions and structured screen flows.
- Production-ready frontend implementation with reusable component structure.
- Integrated workflow support for billing, CRM sync, notifications, and reporting touchpoints.
- QA checklist, release support artifacts, and knowledge-transfer documentation.

Payment Terms

- 50% advance against project confirmation.
- 30% on design sign-off and implementation readiness.
- 20% on final delivery and handover.

Terms and Conditions

- This proposal is valid for 15 days from the issue date.
- Any scope additions beyond the agreed proposal will be estimated separately.
- Client feedback and approvals are expected within agreed review windows.
- Applicable GST will be charged as per prevailing tax regulations.
