

REQUEST FOR PROPOSAL — RESPONSE

Smart Inventory & Demand Forecasting System

PREPARED FOR
Zenith Retail Solutions

REFERENCE
IG-APR-2026-021

ISSUE DATE
03 Apr 2026

VALID UNTIL
20 days from issue date

EXECUTIVE OVERVIEW

Ignisia Digital Labs proposes a smart inventory management system powered by predictive analytics to optimize stock levels, reduce wastage, and improve demand forecasting accuracy. The solution will help Zenith Retail streamline operations and make data-driven inventory decisions.

KEY BUSINESS OBJECTIVES

01

Reduce inventory holding costs by 30%

02

Minimize stockouts and overstock situations

03

Improve demand forecasting accuracy using AI

04

Enhance operational efficiency across retail stores

01 Engagement Overview

PROPOSED SOLUTION

- AI-based demand forecasting engine
- Centralized inventory management dashboard
- Automated stock alerts and recommendations
- Integration with POS and ERP systems
- Mobile app for real-time inventory tracking

WHY IGNISIA DIGITAL LABS

- Custom AI model tailored to retail industry
- Real-time insights with actionable recommendations
- Cloud-based scalable infrastructure
- Enhanced data security and compliance
- Optional future upgrade for supplier automation

02 Scope of Work

01 Business requirement analysis

02 System architecture design

03 Frontend and backend development

04 AI/ML model development for forecasting

05 System integration and testing

06 Deployment and training

03 Delivery Timeline

- Week 1-3: Requirement Analysis & Planning
- Week 4-6: Design Phase
- Week 7-12: Development & Integration
- Week 13-14: Testing & Deployment

04 Commercial Proposal

DESCRIPTION	QTY	UNIT RATE	AMOUNT
Requirement Analysis & Design	1	₹60,000	60,000
Frontend & Backend Development	1	₹1,50,000	1,50,000
AI Forecasting Module	1	₹1,10,000	1,10,000
Mobile App Development	1	₹80,000	80,000
Testing & Deployment	1	₹50,000	50,000

Subtotal 4,50,000

GST @ 18% 81,000

GRAND TOTAL (INR) 5,31,000

05 Key Deliverables

- 01 Inventory management web platform
- 02 Demand forecasting AI module
- 03 Mobile application for store managers
- 04 Integration with existing systems
- 05 User training and technical documentation

1. 30% advance upon project confirmation
2. 40% after development phase completion
3. 30% upon final delivery and acceptance
4. All timelines are subject to client approvals
5. Any third-party integrations will incur additional costs
6. Maintenance post-deployment is optional and chargeable
7. Data ownership will be transferred after full payment
