Strategic Delivery Office

Issue Date

03 Apr 2026

Validity

15 days from issue date

Executive Summary

Ignisia Digital Labs proposes to design and develop a scalable AI-powered fintech platform tailored to enhance digital financial services, improve operational efficiency, and deliver superior customer experience. Our solution leverages modern technologies, data intelligence, and secure architecture to enable Acme Fintech Pvt. Ltd. to stay competitive in a rapidly evolving digital ecosystem.

Business Objectives

- Enhance digital customer onboarding and engagement
- Automate financial processes using AI and machine learning
- Improve data-driven decision making
- Ensure high security and regulatory compliance
- Enable scalable and modular platform architecture

Proposed Response

- Development of a cloud-based fintech platform with microservices architecture
- Integration of AI modules for fraud detection and risk analysis
- User-friendly web and mobile interfaces
- Secure payment gateway and transaction management system
- Real-time analytics dashboard for business insights

Scope of Work

- Requirement analysis and system design
- UI/UX design and prototyping
- Backend and frontend development
- AI/ML model integration

- Testing, QA, and security validation
- Deployment and post-launch support

Commercial Proposal

Item	Quantity	Unit Cost	Total
UI/UX Design	1	Rs. 1,50,000	Rs. 1,50,000
Platform Development	1	Rs. 6,00,000	Rs. 6,00,000
AI/ML Integration	1	Rs. 2,50,000	Rs. 2,50,000
Testing & Deployment	1	Rs. 1,00,000	Rs. 1,00,000
Subtotal			Rs. 11,00,000
GST (18%)			Rs. 1,98,000
Grand Total			Rs. 12,98,000

Why Choose Ignisia Digital Labs

- Expertise in fintech and AI-driven solutions
- Agile development methodology ensuring faster delivery
- Strong focus on security and compliance
- Dedicated project management and support team
- Scalable and future-ready architecture

Timeline and Milestones

- Phase 1: Requirement Gathering & Planning – 2 weeks
- Phase 2: Design & Prototyping – 3 weeks
- Phase 3: Development – 8 weeks
- Phase 4: Testing & QA – 3 weeks
- Phase 5: Deployment & Support – 2 weeks

Key Deliverables

- Fully functional fintech web platform
- Mobile-responsive user interface
- AI-powered fraud detection module
- Admin dashboard with analytics

- Complete technical documentation
- Deployment on production environment

Payment Terms

- 30% advance payment upon project initiation
- 40% upon completion of development phase
- 30% upon final delivery and deployment

Terms and Conditions

- All prices are exclusive of applicable taxes
- Any additional features outside scope will be charged separately
- Client to provide timely feedback and approvals
- Maintenance and support beyond initial period will be billed separately
